15. If you have additional comments or suggestions about the assignments, reading materials, discussions, online materials, projects, rehearsals, performances, exams, or other learning components in this course, please share them here:

I think this course should be offered as a requirement for PhD students in their second year spring semester, instead of professional development. We can still benefit from professional development in our third year or above.

23. Which elements of this course had the most positive impact on your engagement and/or learning?

Problem Sets were the most helpful to me.

This course is very very very helpful and should be made mandatory. This is probably the only class where we learn how to use the data in real time and get an opportunity to get our hands dirty. Please make this course a compulsory one for Econ PhD students in their first or second years (I think second year would be better)

The problem sets and the project, helped broaden my understanding of the things we have learnt in class.

24. Which elements of this course could be improved to have a more positive impact on your engagement and/or learning?

This class does extensive coding and teaches us the exact tools we need as PhD students (navigating GitHub, OSCER, API keys, web scraping)

26. Please provide any additional comments to help us understand your answer.

This is the most important class in the economics graduate program. If there were a way to make it a sequence, the department and university should, especially with Dr. Ransom's excellent teaching skills. Not only the most important, but one of the best.

Please make this course mandatory for all Econ PhDs.
